Delhi, India

[Portfolio](#)

## PROFILE

Backed by a strong foundation in computer science, I have a deep enthusiasm for mobile app development and a keen interest in web design and development. As I progress as a developer, my goal is to write clean, user-friendly code that can be harnessed to build beautiful product.

## WORK EXPERIENCE

### July 2022 - November 2024

Bizcrum Infotect (bijnis)

#### Senior Software Developer

- Contributed to multiple high-impact applications at Bijnis.com that bridge the gap between factories and sourcing managers. Enabled factory owners to streamline operations, connect seamlessly with retailers, and accelerate business growth through technology-driven efficiency.

### November 2019 - June 2022

Splice Global Services Pvt. Ltd

#### Senior Software Developer

- Worked across a diverse tech stack including React Native, JavaScript, TypeScript, Redux, React.js, Angular, and Vue.js to deliver scalable solutions. Led small cross-functional teams on multiple client projects, ensuring timely delivery and maintaining high code quality and client satisfaction.

## EDUCATION

2015 - 2019

### GRAPHIC ERA HILL UNIVERSITY, DEHRADUN

- Bachelor of technology in computer science and engineering

## SKILLS

- React Native
- JavaScript
- TypeScript
- React
- Redux
- WebSocket
- Firebase
- Sentry

## SOCIALS

[Portfolio](#)

## TOOLS

VS Code  
Code editor

Jira  
Project management

Xcode  
iOS development

GitHub  
Code Sharing

Android Studio  
Android development

## LANGUAGES

- English
- Hindi

## PROJECTS

### ■ Bizcrum Infotech (Bijnis.com)

Technologies- React-native, Javascript, TypeScript

Tools & Skills: Redux, CleverTap, Branch.io, Deep Linking, WebSocket, CI/CD

#### Buyer (Sourcing) App

[App Store](#)

[Play Store](#)

- A powerful wholesale trading platform enabling retailers to discover products, place orders seamlessly, and connect with verified suppliers—all through a streamlined mobile experience.

#### RM & SM App (Internal Applications)

- Empowered Relationship Managers and Sourcing Managers with tools for real-time updates, order tracking, communication, and customer relationship enhancement.

**Achievement- Successfully transformed a large-scale Native Android application into React Native, significantly improving performance and user experience across iOS and Android. Impacted over 1 million users with optimized cross-platform functionality.**

#### UI Component Library-npm

- Developed a custom internal NPM package at Bijnis to standardize UI components, design tokens, and utilities—ensuring design consistency and reusability across all organizational apps.

#### Server-Driven UI Kit

Designed and implemented a server-driven UI system for React Native, allowing dynamic screen rendering from backend configs—similar to Flipkart's SDUI—enabling faster updates without app releases.

### ■ Splice Global Services Pvt. Ltd.

Technologies- React Native, React.js, Angular, Vue.js, TypeScript, JavaScript

Tools & Skills: Redux, Santry, Deep Linking, WebSocket, CI/CD

#### AND-GO (Cab Booking App)

- A ride-booking platform allowing users to book cabs at the best available fares in their location.  
{Driver App / Passenger App}

#### Store to Door Delivery App

- Enabled users to schedule pick-up and delivery of personal belongings with one click.  
{User App / Driver App}

#### WORDKITE (Book Publishing Platform)

- A multi-format book engagement platform allowing users to read, listen, view, or publish books digitally.

#### SWIRECARE (Video-Based Hiring Platform)

- A caregiver hiring platform allowing users to view skill-based videos, chat live with caregivers, and make hiring decisions.  
{Video Sharing + Live Chat}

#### StudyIQ – LMS Portal (Web)

- Web application for UPSC, SSC, and other competitive exam aspirants. Features courses, video streaming, quizzes, and doubt forums.

#### AMZ Seller Financing – eCommerce Lending Portal (Web)

- A fintech platform that provides fast funding solutions for Amazon/eCommerce sellers. Features credit scoring, application forms, and dashboards.

#### BookCash – Academic Book Marketplace

- A platform that allows students to buy, sell, or exchange books. Built with user authentication, filters, and real-time chat.

## FREELANCE PROJECTS

### Dia Hotels – Hotel & Homestay Booking App [August 2024- January 2025](#)

- Developed a fully functional cross-platform mobile app for Dia Hotels, a hotel and homestay aggregator. The app enables users to explore properties, apply filters, view on map, and complete bookings with ease.

**Key Features:** Custom map integration, filter system, reviews, bottom sheet UI, and full checkout flow.

### Muwee – Real Money Quiz Gaming App [March 2025- Present](#)

- Currently building a real-money quiz app with trend-based questions, smooth animations, real-time tracking, and synced game states for a fast-paced, engaging experience.

**Key Features:** Real-time score tracking, countdown timers, animated game states, secure wallet system, and reward distribution.
